CONFIDENTIAL REPORT: reports/Q3_APAC_Analysis.pdf

Subject: Q3 Revenue Drop in APAC Region

Date: October 15, 2024

Author: Senior Analyst Team

Executive Summary:

Despite the successful launch of 'DataScout Pro', Q3 revenue in APAC dropped by 12%.

Primary causes identified:

1. Supply Chain Disruptions: The new hardware components for the on-premise deployments were delayed by 6 weeks due to port strikes in Singapore.
2. Currency Fluctuation: The local currency devaluation impacted purchasing power.
3. Competitor Action: 'FinTech Corp' aggressively discounted their legacy product.

Recommendations:

- Accelerate the cloud-only deployment option to bypass hardware delays.
- Adjust regional pricing to account for FX rates.
